

I own a very unique property on the shores of Mabel Lake and been working for the past 5 years on the development and subdivision of the property. Bert Chapman has been working with me on the project for most of the five years. Bert has become a strategic partner in the project through his desire to provide more services than is typical of a real estate agent. He has been instrumental in providing market information, regulatory advice, tax assessment, representation and of course market exposure and professional representation through the sales process. My property has had extensive advertising and I received great value on our first sale. I would highly recommend Bert and Premier Canadian Properties to anyone that has a unique property in a rural or recreational setting.
